Islamic 2-Arts Fair

17-21 HAZİRAN 2026

ATO CONGRESIUM

Islamic 2-Arts Fair

Islamic arts reflect the way Islam perceives and interprets life and existence. The main goal in Islamic Deconstruction is the effort to seek divine truth and beauty. “Allah is beautiful, he loves beauty.” hadith-i Sharif draws the framework of Islamic arts. Islamic arts cover the forms of artistic expression that have developed throughout the historical process of Islamic civilization and are applied in a wide geography. These arts are fed by the teachings and cultural values of Islam. Aesthetics, elegance and functionality are at the forefront of Islamic arts, but figurative depictions are usually limited. Instead, abstract expressions such as geometric patterns, Islamic calligraphy and calligraphy come to the fore.

Although the Islamic arts are diversified between different cultures, they are based on a common aesthetic understanding and moral values system. Art occupies an important place in Islamic societies by reflecting religious beliefs, social norms and philosophical thoughts.

The purpose of organizing this International Islamic art fair serves several important goals including to promote Islamic arts, to emphasize the cultural and aesthetic values in these arts and to enable artists to share their works on national and international platforms. At the same time, to transfer the elegance and sophistication of Islamic arts to future generations by blending them with our ancient heritage. Bringing our artistic heritage together with today's art lovers on a universal level by revealing the aesthetic, spiritual and cultural depth of Islamic art is one of the most basic goals of the fair.
